ICE IW90 Professional Wet & Dry Vacuum

The IW90 is a wet/dry vacuum that utilizes a two-stage tangential vacuum motor with a water lift capability of 120" to enable maximum water recovery. The front-mounted squeegee (26in) further increases efficiency. Any maintenance is incredibly simple thanks to its extra-large recovery tank window. The IW90 also has an ergonomically designed, adjustable handle and rotationally molded body for maximum durability. We understand that you use your machines as hard as possible to do your job, and we recognize that sometimes maintenance is a necessity. That's why our auto scrubbers and cord electric equipment come with a 5 year warranty. We have faith that we put out the best equipment possible, but if anything happens, we're here for you.
