## ***Ermator T7500 Three-Phase HEPA Dust Extractor***

The T7500 (230V) Three-Phase Dust Extractor has 20% more filter capacity than its predecessor, model T75. But don't be misled by its size; the T7500 is easy to transport to and from jobsites. It is also suitable for a pairing with a wide selection of grinders. The T7500 is equipped with Jet Pulse for effective filter cleaning and Longopac dust free changing of bag and easy disposal of the machine's contents. It is also equipped with a quiet, yet powerful turbine motor delivering exceptional airflow at 353 CFM. Its two oversized, tested and certified HEPA filters ensure clean air exhaust. It includes the same sock-style pre-filters that have earned a reputation for providing nonstop grinding and a long service life. The pre-filters can be cleaned from the outside of the tank via Jet Pulse negative air pressure. The unique 70 foot Longopac allows fast, drop-down, dust-free disposal into individually sealed plastic bags.

Get the most out of your T7500 by connecting it to the Ermator C5500 Pre-Separator to make it a three-stage filtration system.

### **Standard Equipment:**

- ◆ **3" Vacuum Hose (33 Feet Long)**
